SUMMARY

Hello! I'm Stefano, a LATAM Software Engineer dedicated to simplifying lives through technology. With 6 years of expertise in Java, Go and Node, along with 5 years on Azure and 3 years on AWS, I excel in crafting clean code and solve complex problems on a daily basis. My proficiency extends to unit testing, event queues, and I bring extensive experience in integrating systems, ensuring smooth and efficient communication between diverse components. Additionally, I have a proven track record of leading teams to successful solutions. Fluent in English, I contribute to agile teams and innovative projects.

EXPERIENCE

11/2022 - Present
Remote/São Paulo

Tech Lead (promoted in team)
V8.TECH

Analytical problem solver with hands-on coding experience. Proficient in task prioritization, microservices architecture, and legacy code management. Skilled in leading Agile releases, overseeing source code management, conducting technical interviews, and developing solutions for seamless integration between company systems. Effective in onboarding new developers and guiding teams to build microservices and APIs that support hundreds of thousands of users for stability, reliability, monitoring, and performance. Specialized in Cloud and DevOps technologies, including Azure, Kubernetes, CI/CD pipelines, APIM, and Quality Gateway. I continuously contributed to the improvement of the SDLC; Troubleshooting and incident response. (Java 11, 17, Node with TS).

09/2021 - 11/2022
Remote/São Paulo

Lead Backend Engineer (promoted in team)
V8.TECH

In addition to handling development tasks, I actively support my teammates, establish coding patterns for the project, conduct technical interviews, and facilitate the onboarding process for new developers. (Java 11, 17, Node with TS).

03/2021 - 09/2021
Remote/São Paulo

Backend Engineer
V8.TECH

Developed REST APIs, integrations, and microservices for a significant project in an agile team. Skilled in task planning and estimation. Worked on business cases for a Health Insurance platform and Learning Management System (LMS). Proficient in Cloud and DevOps technologies like Azure, Kubernetes, CI/CD pipelines, API and Quality Gateway. (Java 11, 17, Node with TS).

08/2020 - 03/2021
Remote

Backend Engineer
Paipe | Tecnologia e Inovação

Back End developer building APIs, integrations, monitoring, serverless functions, databases and documentation. Applied a architecture pattern for many projects of the company. Planning, estimate and detail tasks.
Business cases: Marketplace, payment product, IoT platform.
Cloud: AWS and GCP. (Java 11, NestJS, Node with TS).

EXPERIENCE

11/2019 - 10/2020

Remote

Full Stack Engineer
FazComex Tecnologia

Contributed to a growing startup by developing SaaS, APIs, web scrapers, serverless functions, and integrations. Played a key role in defining features, implementing git flow, and shaping architecture, utilizing AWS cloud services. (Java 11, serverless, NodeJS)

09/2018 - 11/2019

Taquara, Brazil

Full Stack Engineer
Invento Casa Criativa

Developed e-commerces modules and a help desk Saas. Decreased the CPU consumption and response time greater than 60% with cache strategies of many projects. (Java 8, 11)

03/2014 - 02/2016

Igrejinha, Brazil

Instructor
Unialcance

Instructed programming courses and, alongside that, crafted an extensive Full-Stack Development curriculum.

EDUCATION

01/2018 - 06/2020

Bsc, Computer Science
ULBRA

01/2015 - 12/2017

Information Technology Technician
CIMOL
